

CRYOLOTION

Low-temperature shaping and firming treatment

Directions for use

PREPARATION PHASE

Ask the client to lie down on the treatment couch.

Slightly moisten 3 crepe bandages with water.
Mix 50 ml. of CRYOLOTION with 150 ml. of cool water.
Soak the crepe bandages in this mixture. Wring out excess liquid.

Starting from the knee, wrap each thigh, overlapping the bandages for double thickness. Wrap abdomen and hips with the third bandage.

Ask the client to bend her legs. Let her rest for about 45 minutes without covering the treated areas, thus allowing evaporation and permitting the product to work.

Remove the bandages and finish the treatment by the application of **CRYOGEL**.
Advise your client to use the CRYOGEL at home.

IMPORTANT

The client should not shower or sunbathe for 2 hours after this treatment.

FREQUENCY OF APPLICATION

Twice a week the first 2 to 3 weeks and then once a week.

FOR CLIENT'S HOME USE

CRYOGEL: Daily
